ABSTRACT:

Multifunctional pocketed heel on footwear and imitations footwear, utilizing the heel as a functional compartment to store items, and/or as a decorative purpose. The heel attached to the footwear and imitations features locking device(s) to secure items within the heel. Heel features a hollow space within in which to store items, hence providing space for contents in addition to the interior of the footwear and its imitations. Case in point, imitations of footwear refers (but not limited to) items such as bag designs in the configuration of a footwear where in the functional heel can provide the additional space to store valuables. As a walking footwear function as a hideaway compartment to hide valuables.
